

Professional Summary

Undergraduate Computer Science & Engineering student (E-Commerce Technology) with a strong foundation in software development, programming fundamentals, and problem-solving. Seeking this Program Internship to gain real-world experience in software engineering, collaboration, and building impactful technology solutions.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering (E-Commerce Technology) Jun '28

VIT Bhopal University

- Relevant Coursework:
- Introduction to Computer Science
 - Database Management Systems
 - Data Analysis
 - E-Commerce Systems
 - Operations Management

Technical Skills

Programming Languages: Python, Java (Basic)
Web Technologies: HTML (Basic), CSS (Basic – Learning)
Databases: SQL (Basic)
Tools & Platforms: MATLAB, MS Excel (Pivot Tables, Lookups), PowerPoint
Core Concepts: Software Development Fundamentals, Problem Solving, Basic Data Structures

Certifications & Learning

- Programming Constructs – MathWorks
- MATLAB Onramp – MathWorks
- Python Essentials – Vityarthi
- AI & ML – Vityarthi
- Artificial Intelligence (Beginner) – Simplilearn
- Introduction to Programming Using Java – Vityarthi

Project Experience

Online Ambulance Booking Service

- Developed a web-based platform enabling users to book ambulances during emergencies.
- Implemented efficient request handling and basic workflow design to improve service response.
- Collaborated on requirement evaluation, feature planning, and documentation.
- Gained hands-on experience with real-world problem solving and software implementation.

Soft Skills

Analytical Thinking
Problem Solving
